Work Undertaken that Best Illustrates Capability to Handle the Task Assigned

Title of Work: Strengthening Project Preparation Capacity in Asia and the Pacific - Supporting Preparation of Infrastructure Projects with Private Sector Participation in Asia Pacific (Subproject 4) - #3 INO: PSP Structuring Expert (Creating Investable Cities, Makassar) (49407-005)

Year: Dec 2023 - Ongoing

Location: Indonesia

Client: Asian Development Bank

Position Held: PPP Structuring Expert

Main features:

The Creating Investable Cities TA is a cross-thematic and multi-sectoral, One ADB initiative led by the ADB's Office of Markets and PPP. CIC leverages ADB's resources, knowledge, and partnerships to help DMC partner cities to increase their technical, financial, and managerial capacity to develop quality municipal infrastructure, improve their ability for local resource mobilization, and enhance their competitiveness and resilience post-COVID-19. The Program relies on the use of frameworks and tools to improve infrastructure planning, financing, and funding at the municipal level. ADB has launched the CIC in August 2022.

The selected consultant will support ADB in Makassar, identifying procurement models for the long list and PPP screening, in identified Partner City under the ADB's Creating Investable Cities program

Activities (to be) Performed:

1. Review the list of recommendations of policies, projects and solutions and based on the preliminary outputs of the consulting firm and assist the screening for private sector participation;
2. Assist in evaluating suitable commercial structures based on preliminary financial assessment provided by the consulting firm;
3. Provide inputs related to PPP and other PSP structuring options required for development of Project Concept Papers, based on country regulations;
4. Ensure that the reasoning and structuring for the identified PPP and other PSP related solutions follow smoothly through previous CIC tools to provide a holistic understanding of the various elements needed to ensure maximizing value-for-money for the city, and associated costs and benefits to city stakeholders;
5. Guide the design and development of the end-products, with recommendations on how they could be developed as templates for implementation in other cities.
6. Discuss the linking of these PPP processes at the city level with the Public Investment Management process and provide recommendations to Consulting team to improve the interlinkage

Title of Work: Comprehensive Training Service on PPPs, Bangladesh

Year: Mar 2023 – Jul 2023

Location: Bangladesh

Client: PPP Authority, Bangladesh (funded by the World Bank)

Position Held: Lead Trainer (one of the team)

Main features:

PPP Authority of Bangladesh has organized a comprehensive programme for improving the PPP capacity across various government departments in Bangladesh and had designed multiple training programmes spread across 2023 and comprising 5-day programs and 15-day programs. The overall capacity building program is funded the World Bank.

The PPP Authority has selected a consortium of SREI, Grant Thornton and Associated Staff College of India (ASCI). Sekhar is one of the named trainers on the team.

Activities Performed:

1. Suggested on training content for the PPP practitioners taking into view the Bangladesh PPP regulations and good practices 2. Undertaking 5 days of training programs each involving not less than 25 mid-senior to senior government officials across departments and PSUs of the government of Bangladesh as one of the two lead trainers in each program. The training program include: ○ PPP Framework in Bangladesh ○ PPP Project Conceptualization including Needs Identification and Analysis, PPP Project Pre-Feasibility and Preliminary Economic & Cost-Benefit Analysis ○ PPP Project Preparation including Demand Analysis, Financial Feasibility, Risk Analysis, Economic Analysis, Bankability and Project Structuring ○ Procurement – PPP Projects v/s Conventional Projects; Unsolicited Proposals ○ Procurement including Selection Process, PPP documents including various PPP Agreements ○ PPP Contract Management and Monitoring
Title of Work: Transaction Advisory Services for Detailed Business Case Model for Terminal 2 and Terminal 3 of Bay Terminal Project under CPA Year: Mar 2023 - ongoing Location: Bangladesh Client: Ernst & Young LLP, India (Main Client: Chittagong Port Authority) Position Held: Financial Modeler/Specialist Main features: Ernst & Young LLP (EY), India was selected as transaction advisor by the Chittagong Port Authority (CPA), for the development of detailed business case model for Terminal 2 and Terminal 3 at Bay Terminal, Chittagong Port. The key scope of the engagement included assisting the government in designing, delivering, and implementing the above project on PPP after undertaking comprehensive project risk assessment. This included structuring the project, developing a commercial model, develop bidding documents, assist in bidding process, transaction advisory and award of project to ensure value maximization for the CPA. EY had showcased Sekhar as one of the key experts and engaged him for rendering various services related to financial structuring, financial model development and risk assessment modules. Activities (ongoing): 1. Providing guidance and inputs to the EY team in developing the financial model for the project, including the components/assumptions pertaining to traffic, tariff, capital costs, operational costs, revenue, financing etc. drawing upon considerations for the PPP Transaction Structuring as per the Client's terms of reference, key stakeholders' inputs/decisions in the course of the engagement, master plan prepared by the technical consultant and good industry practices. 2. Assist the team in exploring various commercial structures, develop financial model, provide various alternatives to make the project bankable in view of the applicable regulations in Bangladesh and expectations of CPA 3. Participate in internal discussions on work products, deliverables, etc. as well as discussions/ meetings/ presentations with the Client from time to time.
Title of Work: Competitiveness of Major Ports against Non-Major Ports in India with a special emphasis on Paradip Port Year: June 2022 Location: India Client: Paradip Port Authority Position Held: Subject Matter Specialist

Main features:

The competition between Major ports and Non-major ports is steadily increasing over the years. Earlier, the Major ports held a dominant share of cargo handling compared to Non-major ports in the cargo handling throughput of the country. Over the period of years, Non-major ports have increased their share in cargo handling throughput. Cargo for Major Ports and Non-Major Ports originates from the same hinterland thus competition is increasing day by day. Although, MPA Act 2021, among other things, aims to promote the expansion of port infrastructure, facilitate trade & commerce and grants autonomy in decision making, it is still felt to examine the competitiveness of Major ports against Non-major ports with an emphasis on Paradip Port.

In light of the situation, PPA has decided to carry out a detailed study on 'Developing Competitiveness of Major Ports against Non-Major Ports with a special emphasis on Paradip Port' by engaging a consultant. The report should contain recommendations, suggestions, and strategies for Major Ports to be competitive against Non-major Ports.

Activities Performed:

1. Review the trends of traffic, capacity utilization, efficiencies of major ports and non-major ports
2. Prepare guidance on the competitiveness drivers, sample competitiveness frameworks and global examples for improving port competitiveness.
3. Prepare key takeaways for the major ports in India
4. Identify specific issues, interventions, and action points that major ports can adopt towards improving their competitiveness on infrastructure, technology, business environment and positioning related areas

Title of Work: TA-6588 REG: Program Coordinator for Subnational Financing Program

Year: Nov 2021 – Ongoing

Location: Asia

Client: Asian Development Bank

Position Held: Project Coordinator

Main features:

The Creating Investable Cities (CIC) TA is a cross-thematic and multi-sectoral One ADB initiative led by the PPP Thematic Group Secretariat. CIC leverages ADB's resources, knowledge, and partnerships to help DMC partner cities to increase their technical, financial, and managerial capacity to develop quality municipal infrastructure, improve their ability for local resource mobilization, and enhance their competitiveness and resilience post-COVID-19. The Program relies on the use of frameworks and tools to improve infrastructure planning and investment at the municipal level.

Activities (ongoing):

1. Coordinate the multiple frameworks and tools, and capacity development programs spanning areas of project finance, local resource mobilization, PPPs, competitiveness, gender, and resilience.
2. Responsible for facilitating coordination among the consultants and partners supporting the development of the program.
3. Advise ADB on the design of other potential One ADB programs to support ADB's other ongoing PPP- and infrastructure-finance related capacity building initiatives
4. Responsible for various activities within the Program including preparation of investment proposals, coordination with consultants, review of the deliverables, capacity development program related to Creating Investable Cities, CRAFT finalization and application, coordinate for internal approvals for CIC tools and frameworks and management of day-to-day activities related to CIC
5. In the first year of launch, CIC is proposed to be implemented in Indonesia (Makassar city), Malaysia (Penang), Georgia (Tbilisi), Mongolia (Ulaanbaatar) and a few other cities in India and Vietnam that are under consideration. Assist the program leader in preparing notes, applications for funding, etc

Title of Work: Feasibility Studies and Transaction Advisory services – Multiple projects

Year: Oct 2021 – Ongoing

Location: Hyderabad, India

Client: Telangana Project Consultants Private Limited

- h. Bid Advisory services for Development of Plug and Play Infrastructure development on 100 acres land in Dandumalkapur of Telangana State Industrial Infrastructure Corporation (**Main Client:** Bhumi World)

Activities (ongoing):

1. Preparing Prefeasibility report including financial analysis, demand, and market study
2. Assistance in preparing the bidding documents
3. Assistance in client meetings and presentations
4. Guidance to team members, quality assurance and timely delivery

Title of Work: Master Planning for JNPT

Year: Oct 2021 – Jan 2023

Location: Mumbai, India

Client: Tata Consulting Engineering (**Main Client:** Jawaharlal Nehru Port Trust)

Position Held: Traffic/ Logistics Expert

Main features:

The JNPT invited proposals for selection of Consultancy Services for Updating Master Plan of JN Port who shall provide consultancy services towards the preparation of Master Plan of JN Port. The Consultancy Services shall review earlier Master Plan and all other related documents / traffic report, project material, waterfront projects, sea connectivity, road & rail connectivity, logistics, warehousing, SEZ port led industrialization etc. and undertake activities in conformity with the Terms of Reference. The Master Plan of the Port was updated in 2016 and there are various developments in the Port and no water front area is left

for initiating technical feasibility of the project. The Port has also initiated various facilities under Ease of Doing business. In order to further modernize the port and to meet the latest requirement of world standard with smooth evacuation of the cargo and further increase the business and to cater demand of Trade, the port is exploring the possibilities to update Master Plan of JN Port. The Study includes both technical, market and financial studies under the scope of works.

Activities Performed:

1. Studied of various master plan reports, traffic reports and related reports of JNPT including traffic projections, site conditions, etc
2. Undertake primary interactions with port users to understand the bottlenecks and areas of opportunity for growth for the Port
3. Prepare traffic projections for the next 15 years taking into account various developments in the hinterland and the changes in competitive landscape in form of existing and planned port developments
4. Identify specific projects that may be required to be undertake by the Port to facilitate traffic growth, which were further reviewed technically by technical consultants
5. Provide inputs towards financial viability of the proposed plans and interventions

Title of Work: Preparation of Detailed Master Plan and Preliminary Design Report for basic infrastructure for Integrated Manufacturing Cluster at Gaya in Bihar under Amritsar Kolkata Industrial Corridor Project

Year: Sep 2021 – Ongoing (project on-hold due to land acquisition delays by government)

Location: Gaya, Bihar, India

Client: Tata Consulting Engineering (Main Client: National Industrial Corridor Development Corporation)

Position Held: Market Assessment Expert

Main features:

National Industrial Corridor Development Corporation Ltd (NICDC) is undertaking the activities related to Preparation of Detailed Master Plan and Preliminary Design Report for Roads & Services/ Utilities for Integrated Manufacturing Cluster (IMC) at Gaya in Bihar under Amritsar Kolkata Industrial Corridor (AKIC) Project. An area of approximately 1,635.7 acres has been demarcated for the development of IMC at Gaya.

Activities Performed:

1. Prepared a demand assessment to establish the industry mix, the range of economic activities, projected population and employment for the identified Economic Node and prepare a detailed financial analysis that together will form the basis for the development program for the detailed master plan
2. Financial analysis for the project, which will also include estimation of financial internal rate of returns IRR etc. for the project.
3. Provide inputs to technical consultants as needed.
4. Client interactions, primary interactions towards completion of the deliverables

Title of Work: Consultancy services for the preparation of the 2021-2025 NEPAD-IPPF Strategic Business Plan

Year: May 2021 – Oct 2021

Location: Hyderabad

Client: CRISIL Risk and Infrastructure Solutions Limited (Main Client: African Development Bank)

Position Held: Consultant

Main features:

The operations of NEPAD-IPPF are guided by a 5-year Strategic Business Plan (SBP), the latest one having been prepared for the period of 2016-2020 which focused on increasing the availability of viable, well-prepared regional and continental infrastructure projects, enhancing collaboration among project stakeholders and project financiers, and improving the financial sustainability of project preparation for regional infrastructure. As the latest SBP period has ended in 2020, NEPAD-IPPF now seeks to develop a new

SBP for the next 5-year period of 2021-2025, with the objective of allowing NEPAD-IPPF to grow further, and fulfil its role of preparing good, viable, transformative and priority regional transport, energy, ICT, and water infrastructure projects in Africa. The new SBP will also enable NEPAD-IPPF to define or refine its resource mobilization approach and strategy amongst other important objectives, which will support its objective of ensuring financial sustainability and maintenance of its role as a premier Project Preparation Facility on the continent. In this context, AfDB has appointed CRISIL Risk and Infrastructure Solutions Limited, India (CRIS) to support AfDB in reviewing the implementation of NEPAD-IPPF 2016-2020 SBP and for preparing the NEPAD-IPPF 2021-2025 SBP. Four thematic working papers on (i) Demand for infrastructure project preparation and financing in Africa; (ii) Infrastructure development, new market trends and benchmarking; (iii) SWOT analysis for NEPAD-IPPF; and (iv) Sectoral approach and positioning of IPPF, are to be prepared, and would feed into the preparation of the SBP

Activities Performed:

1. Lead the drafting of the Working Paper 1 on “Regional Infrastructure Project Preparation Demand in Africa based on Sector Programs and Emerging Trends for Transport, Power, ICT, and Water Resources Management” with the support of the CRIS team and under the guidance of the CRIS Team Leader to the time and quality specifications in the TOR and to the expectations of the Client and other key stakeholders associated with the assignment
2. Working paper would focus on the upcoming programs and projects in Africa in the sectors of focus for NEPAD-IPPF over the next five years (SBP period), and arrive at the regional project preparation demand aligned with these upcoming programs and projects.
3. Working paper would also draw select inputs from the emerging infrastructure development and financing trends in Africa (based on globally emerging infrastructure development and financing trends) for the sectors of NEPAD-IPPF's focus
4. Undertake preliminary screening of project opportunities using appropriate framework for the next SBP period for IPPF.

Title of Work: Financial Assessment for the Visakhapatnam Tram (LRT) and Warangal Metro Neo Projects

Year: Jun 2020 – Mar 2021

Location: Hyderabad

Client: Urban Mass Transit Company Limited (UMTC) (**Main Client:** Mahametro (for Warangal) and Andhra Pradesh Metro Rail Corporation (for Visakhapatnam LRT))

Position Held: Financial Expert

Main features:

On two different mandates that were handled by UMTC – one in the state of Telangana proposing to develop metro neo project in the Warangal town and the second in the state of Andhra Pradesh that proposed to develop Light Metro and Tram systems in the city of Visakhapatnam, UMTC had engaged Mr. Sekhar Tanguturi and Mr. Venkat Paleti, independent experts, to undertake financial analysis, explore various options to improve financial metrics and suggest appropriate project structure and suitable financing options as per the project requirements and the Metro Rail policy of the MoHUA, Government of India.

Activities Performed:

1. Engage in discussions with the Client and the co-team to define project contours
2. Discuss and finalize the project financing options based on the technical and market inputs as well as the relevant policy guidelines for the development of metro rails in India
3. Preparation of financial model along with various financing options and sensitivities to provide key financial metrics
4. Submit relevant reports on the financial analysis along with advise on the structuring options.

Title of Work: Review of Concession Agreements in the role of independent expert/ engineer for logistics parks in Hyderabad

Year: Jan 2021 – Ongoing

Location: Hyderabad

Client: Telangana Projects Facilitators & Consultancy Services (**Main Client:** Hyderabad Metropolitan Development Authority)

Position Held: Subject Matter Specialist

Main features:

Hyderabad Metropolitan Development Authority (HMDA) has awarded two logistics parks in the year 2017, in Hyderabad, on PPP (DBFOT) basis. These are the first set of logistics parks awarded on PPP basis in the country. HMDA is in the process of review of the compliance against the obligations and responsibilities of both Parties, and has selected Telangana Projects Facilitators & Consultancy Services (TPFCS) in the role of independent engineer and expert to provide services defined under the Concession Agreements. TPFCS has engaged Mr. Sekhar Tanguturi in the role of subject matter specialist and contracts expert to review the aspects of compliance and assist the Main Client for better contract management of the Concessions.

Activities Performed (ongoing):

1. Review the signed Concession Agreements of both the logistics parks
2. Undertake site visits along with the technical team to get a first hand view of the on-the-ground developments
3. Engage in discussions with the Concessionaires and the Concessioneing Authority to understand the progress from the date of signing of agreements till the start of the consultancy project
4. Submit reports on compliance, deviations, actions to be taken in line with the provisions of Concession Agreement
5. Engage on a continuous basis to ensure that both Parties are working towards achieving the outcomes of the Concession terms.

Title of Work: Origin Destination Study at Kolkata Dock System, Syama Prasad Mookerjee Port Trust, Kolkata

Year: Apr 2021 – Dec 2021

Location: West Bengal

Client: KPMG Advisory Services Private Limited (**Main Client:** L&T Infrastructure Engineering Limited, Kolkata Port Trust)

Position Held: Ports Specialist

Main features:

Syama Prasad Mookerjee Port Trust (SPMPT) has selected L&T Infrastructure Engineering Limited (LTIEL) to undertake a 20-year master planning for the two port systems under SPMPT including Kolkata Dock System and Haldia Dock Complex. LTIEL has approached KPMG Advisory Services Private Limited (KASPL) to undertake a detailed traffic study for various commodities and provide traffic forecasts for both the port systems for a 20-year horizon.

Subsequently, KASPL was provided an additional mandate to work on Origin Destination Study at Kolkata Dock System, the scope of which included:

- a. Sector Wise (Steel, alloys, Agro etc.) and Export/Import House wise to identify the big industries in the hinterland of Kolkata Dock
- b. Obtain historic customer data from the Port related to all importers, and exporters for especially container traffic. Analyse the data collected and shortlist the top 50 players.
- c. Assess reasons for decline in cargo, movement to other ports (if any), drivers for selection of port, expectations from the SMP and growth potential.
- d. Review container traffic trends at KDS and nearby Ports
- e. Identifying the interventions required at port level and identification of Exporter and Importer wise traction plan

KASPL has engaged Sekhar Tanguturi for the role of ports specialist to provide inputs to the team for execute the engagement, oversee the preparation and submission of the entire deliverable, quality review and ensure client satisfaction.

Activities Performed:

1. Prepare shortlisting framework for identifying top players
2. Review past traffic trends based on commodity-wise assessment of container traffic
3. Led the team for primary interactions with port users and trade facilitators using structured interview process
4. Mapping the key issues and identifying port-side interventions for ensuring client retention and traffic growth for containers
5. Review the reports for the above tasks to ensure quality and timely delivery

Title of Work: Financing Options for internal infrastructure development at Hyderabad Pharma City

Year: Dec 2020 – Mar 2022

Location: Hyderabad

Client: World Resources Institute

Position Held: Lead Consultant

Main features:

The Government of Telangana envisions to develop Asia's largest integrated sector-specific (Pharma) industrial area in the vicinity of Hyderabad to attract the pharmaceutical giants with focus on manufacturing, value-added services, pharmaceutical-ancillaries, and education & skill centres, along with commercial, residential, and social infrastructure. The Hyderabad Pharma City ("**Project**") has been envisioned to develop an ecosystem for all segments of the pharmaceutical industry and evolve into a self-sustaining cluster that connects across the Pharma value chain.

World Resources Institute ("**WRI**") is advising TSIC on various elements related to the Project. In this relation, WRI has engaged a team of consultants comprising Mr. Sekhar Tanguturi, Mr. Venkateswara Rao Paleti and Ms. Sushama K to provide a report on the financing options that could be evaluated for the development of internal infrastructure in HPC and based on the same, develop appropriate financial models at infrastructure sub-sector level to assess the overall financing gap at the HPC level.

Activities Performed:

1. Assessing existing innovative financing models from the country that may be adapted and used within the HPC context in financing infrastructure
2. Develop a framework for financial model and Break-Even analysis of infrastructure
3. Devise financial models for each of the infrastructure sub sector with PPP being the first mode of implementation, wherever applicable
4. Explore the financial feasibility of various PPP options for the infrastructure (unbundling of infra components wherever feasible)
5. Conduct financial evaluation of project viability and financial analysis at project level
6. Assess the revenue potential of the project through land sales etc and conduct sensitivity analysis on impact of phasing of revenue potential and project financial feasibility
7. review the financial and institutional requirements at a broad level, to ensure the investments are sustained over their full design life

Title of Work: Traffic Enhancement Strategies for Syama Prasad Mookerjee Port Trust, Kolkata

Year: Jul 2020 – Jun 2021

Location: West Bengal

Client: KPMG Advisory Services Private Limited (**Main Client: L&T Infrastructure Engineering Limited, Kolkata Port Trust**)

Position Held: Ports Specialist

Main features:

Syama Prasad Mookerjee Port Trust (SPMPT) has selected L&T Infrastructure Engineering Limited (LTIEL) to undertake a 20-year master planning for the two port systems under SPMPT including Kolkata Dock System and Haldia Dock Complex. LTIEL has approached KPMG Advisory Services Private Limited (KASPL) to undertake a detailed traffic study for various commodities and provide traffic forecasts for both the port systems for a 20-year horizon.

Subsequently, KASPL was provided an additional mandate to work on traffic enhancement strategies for the Port – primarily looking into two aspects viz.,

- a. Integration of Waterways to enhance port traffic
- b. Client-retention strategies for the top users of the Port

KASPL has engaged Sekhar Tanguturi for the role of ports specialist to provide inputs to the team for execute the engagement, oversee the preparation and submission of the entire deliverable, quality review and ensure client satisfaction.

Activities Performed:

1. Explore the ways by which SPMPT could benefit from the growth in the infrastructure at NW 1 and NW 2 with specific reference to trade with Nepal, Bangladesh, and Bhutan. Towards this, undertake or guide the team to undertake
 - a. Evaluate the infrastructure developments at NW1 and NW2
 - b. Evaluate the transit trade and bilateral trade that could shift to waterways by way of identifying ODs, conducting total logistics costs analysis, understanding bottlenecks
 - c. Suggest interventions/ strategies required to capture the potential divertible trade
2. Develop retention strategies by evaluating the needs of the top players of the Port that could potentially move to the planned ports of Subarnarekha and Tajpur. Towards this, undertake or guide the team to undertake
 - a. Shortlist the key accounts of Port using multiple criteria in consultation with the Client
 - b. Undertake primary interactions with the shortlisted key accounts to understand their concerns, their port selection preferences, and deliberate potential options to overcome the constraints
 - c. Ideate on the potential solutions that the Port could offer despite its natural limitations
3. Review the reports for the above tasks to ensure quality and timely delivery
4. Participate in Client discussions and take the assignment towards a closure

Title of Work: Preparing a note on Policy Outlook for Major Ports

Year: May 2020

Location: India

Company: Visakhapatnam Port Trust

Position Held: Consultant

Main features:

The Directorate General of Shipping (DG Shipping) has constituted working groups identifying thrust areas that are aimed at reforming the policy, finance and infrastructure related areas for Major Ports and has assigned the responsibility of each area to a Major Port. Visakhapatnam Port (VPT) was assigned Thrust Area – 10 which was related to “Reforms in All Maritime Acts / Laws / Regulations/Policy”. As part of the same, Visakhapatnam Port had to develop report on five action points viz.,

- a) Develop a PPP Policy based on the experience gained over the years
- b) Revisions required in MCA, standardise documents like RFP, RFQ etc
- c) Promotion of Fair Competitiveness among Major Ports
- d) Liberalized policy for Promotion of dedicated and Captive Jetties / Berths
- e) Provision to be made to allot land inside/outside custom bound area for port related activities on license basis based on the Cargo throughput (Port to end-user direct)

VPT has directly engaged the services of Mr. Sekhar Tanguturi to prepare a comprehensive note on the above areas

Activities Performed:

1. Review existing practices and policy areas for Major Ports
2. Undertake primary interactions with select port operators
3. Prepare comprehensive note on each of the areas indicating existing practices, global best practices, suggested changes in each of the above areas
4. Concepts of Green Port, Smart Port – concept, requirements, and policy considerations for Major Ports
5. Discuss the findings and recommendations with the Committee constituted by the DG Shipping
6. Submit the report covering the areas above

Title of Work: Development of PPP Monitor

Year: Mar 2020 – Sep 2021

Location: India

Company: CRISIL Risk and Infrastructure Solutions Ltd (**Main Client: Asian Development Bank**)

Position Held: Consultant

Main features:

Asian Development Bank publishes PPP Monitor covering the PPP landscape including national framework and sector-related regulations, past experiences, and project preparatory pipeline. The last Monitor (version 2) was published in 2018 and ADB has assigned CRISIL Infrastructure Advisory an individual contract for preparing version 3 of the publication updating the version 2 and also appending additional sections including the local government regulations.

CRISIL has engaged Sekhar to prepare the version 3 as noted above for 5 countries.

Activities Performed:

1. Review of Monitor 2 publication of ADB
2. Collate secondary sources of information related to regulations across the PPP spectrum at a national, local and sectoral level
3. Prepare report in line with the required formats and highlight gaps to be discussed with the country missions of ADB
4. Countries covered include Bangladesh, Pakistan, India, Indonesia, Vietnam.

Title of Work: Bid Structuring and Bid Documentation Assistance for Development of Integrated Multi-Modal Logistics Park of 870 acres at Nangal Chaudhary in Haryana

Year: Nov 2019 – Dec 2020

Location: New Delhi, India

Client: KPMG Advisory Services Private Limited (**Main Client: Delhi-Mumbai Industrial Corridor Development Corporation**)

Position Held: Subject Matter Specialist

Main features:

Dedicated Freight Corridor Corporation of India Limited (DFCCIL) has envisaged setting up of multi-commodity multimodal logistics parks through public private partnership (PPP) alongside DFC corridors at strategic locations for capturing bulk/break bulk, unitized, liquid, reefer and Ro-Ro traffic that would establish an integrated logistics chain for more efficient and greater use of rail transport to service physical distribution of goods. Haryana is a major industrial hub in North India with sectors like manufacturing, retailing, etc. It has rapidly become an attractive proposition for investors due to its proximity to the National Capital Region (NCR). Haryana State Industrial Infrastructure Development Corporation (HSIIDC) plans to develop an Integrated Multi-Modal Logistics Hub along WDFC to boost economic development in the state by providing world class logistics and transport infrastructure. It is with this background that

DMICDC, as an executing arm of the Project, has engaged the consortium of RITES Ltd., KPMG, and L&TIEL for the Techno-Economic Feasibility Study for IMLH at Nangal Chaudhary in Haryana along WDFC.

KPMG has engaged Sekhar to provide inputs towards structuring of the Project on PPP and prepare bid documents for the Project.

Activities Performed:

1. Understanding the master plan, financial analysis outcomes and project viability related aspects
2. Undertake discussions with Client related to potential commercial structures and packaging of various project components
3. Prepare bid documents including RFQ, RFP and Draft Concession Agreement, in consultation with consortium partners, and Client
4. Attend Client meetings and discussions and achieve closure of the documents

Title of Work: Preparation of Model Concession Agreements for Passenger Rail and Freight Rail for G-RIDE

Year: Nov 2019 – Jul 2020

Location: Ahmedabad, Gujarat (India)

Client: KPMG Advisory Services Private Limited (**Main Client: Gujarat Rail Infrastructure Development Company**)

Position Held: Subject Matter Specialist

Main features:

Gujarat Rail Infrastructure Development Corporation Limited (G-RIDE) was incorporated with equity contribution of 51% from Government of Gujarat (GOG) and 49% from Ministry of Railways (MOR). G-RIDE was formed with a mandate to carry out activities related to developing, financing, planning, operations and management, implementation of viable railway projects that are critical in nature. The projects may also require viability gap funding (VGF) and all the activities related to implementation of such projects have to be carried out by G-RIDE. In order to undertake projects on PPP and to create an execution framework, G-RIDE has engaged services of KPMG Advisory Services Private Limited to prepare White Paper on best practices, and Model Concession Agreements for freight and passenger rail services.

Activities Performed:

1. Identify and guide the team on preparation of White Paper including structuring the paper, select international benchmarks, prepare case studies, identify key takeaways, etc
2. Client discussions on the progress of work, selection of models to adopt for preparation of Model Agreements
3. Identify key contours of the Model Agreements, prepare risk-sharing dynamics and seek client acceptance for the same
4. Prepare Model Concession Agreements for Freight and Passenger Rail Services in keeping with client expectations and requirements

Title of Work: Regional Trade facilitation and Transport sector review for the BBIN countries

Year: Dec 2019 - Ongoing

Location: Multiple (Bangladesh, Bhutan, India, and Nepal)

Client: Ecorys India (**Main Client: World Bank**)

Position Held: Marine Engineer - Additional Expert

Main features:

Bangladesh, Bhutan, India, and Nepal (BBIN countries) have a key role to play in fostering regional economic integration in South Asia. Gravity models show that total goods trade within South Asia could be worth US\$67 billion rather than the actual trade of only US \$23 billion. These large gaps are because of barriers including disproportionately high costs of transport and trade within the region reflecting poor

transportation and logistics infrastructure, inefficient trade facilitation, and high tariffs, para tariffs and complicated and non-transparent nontariff measures (NTMs). Transport infrastructure is a major stumbling block in trade participation. Logistics infrastructure has been cited as the most important trade-related issue in Global Value Chain participation for firms in developing countries, and incomplete infrastructure raises costs, reduces market participation (i.e. for perishable goods) and undermines firm competitiveness. Accordingly, the World Bank intends to provide assistance, which comprises of two main objectives and activities:

TASK A: Prepare a detailed assessment of multi-modal transport infrastructure, trade-supporting infrastructure, policy, institutional, and regulatory environment in the BBIN countries

TASK B: Identify and prioritize physical and institutional interventions to facilitate the implementation of an efficient and effective multi-modal transport system along priority regional transport corridors.

The World Bank Group in Washington DC, USA has granted a contract to a Consortium of ECORYS Nederland B.V; as Lead Member; with Ecorys India Pvt Ltd (hereinafter referred to as Consortium) for the implementation of study entitled “Regional Trade Facilitation and Transport Sector Review for the BBIN Countries”

As a named additional expert on the project, Sekhar has been engaged to closely assist the international key expert – Marine Engineer, for executing the project.

Activities Performed:

1. Identify and conduct stakeholder interactions in each country and collate relevant information, data and development plans related to marine transport and inland water transport (IWT)
2. Review relevant reports/ studies pertaining to ports and IWT, freight transport and linkages to major roads and railway
3. Identification of data gaps and devising of strategy to bridge the gaps. The gaps shall primarily be related to infrastructure, capacity and policy and the Consultant shall list the gaps and suggest strategies
4. Review of inland waterway and marine transport costs
5. Identify bottlenecks which inhibit the use of inland waterway as a means of freight transport
6. Detailed review of the inland waterway infrastructure including ports and allied infrastructure, barges/ ships/ vessels
7. Review of all legal, national, and regulatory framework pertaining to inland waterway transport
8. Inputs in short term and medium term trade and transport sector investment program in consultations with the Marine Engineer and Team Leader.

Title of Work: Bid Documentation Assistance for Development of 60 MLD Desalination Plant at Ramananthapuram in Tamil Nadu

Year: Jun 2019 – Sep 2019

Location: Tamil Nadu

Client: Tirujan Engineering & Consultancy Private Limited (**Main Client: TamilNadu Water Investment Company**)

Position Held: Subject matter specialist

Main features:

The TamilNadu Water Supply and Drainage Board (“TWAD”) is a statutory body corporate constituted under TWAD Board Act, 1970 and entrusted it with the development of Water Supply and Sewerage facilities in the State of TamilNadu. TWAD has decided to undertake development and operation/ maintenance of a 60 MLD Sea Water Reverse Osmosis Desalination Plant along with treated water storage tank of 18ML capacity, in Kuthiraimozhi in Ramanathapuram District, TamilNadu through Hybrid Annuity Model on Design, Build, Operate and Transfer basis. TWAD has engaged Tamilnadu Water Investment Company (TWIC) which is a pioneering developer of water projects in India ranging from urban water and sewerage systems, desalination, industrial effluent management and recycling. TWIC has engaged services of Tirujan Engineering for preparation of financial analysis and bid documentation for the said project.

Activities Performed:

As part of Tirujan's team, Sekhar has been involved in

1. Discussing with TWIC on major components of the Project including financial metrics, project structure, government budgets, execution timelines, risk sharing elements, amongst others
2. Prepare RFQ, RFP and Draft Concession Agreement for selection of private sector partner for development of the Project
3. Provide clarifications, amendments to the documents and assist in discussions with TWAD.

Title of Work: Master Planning for Kolkata Port

Year: Jul 2019 – Jun 2020

Location: West Bengal

Client: KPMG Advisory Services Private Limited (**Main Client: L&T Infrastructure Engineering Limited, Kolkata Port Trust**)

Position Held: Consultant

Main features:

Kolkata Port Trust (KoPT) has selected L&T Infrastructure Engineering Limited (LTIEL) to undertake a 20-year master planning for the two port systems under KoPT including Kolkata Dock System and Haldia Dock Complex. LTIEL has approached KPMG Advisory Services Private Limited (KASPL) to undertake a detailed traffic study for various commodities and provide traffic forecasts for both the port systems for a 20-year horizon. KASPL has engaged Sekhar Tanguturi for the role of subject matter specialist and oversee the preparation and submission of the entire deliverable.

Activities Performed:

1. Detailed review of the historical traffic, key traffic categories, growth rates
2. Identify growth drivers for various commodities
3. Primary interactions with key stakeholders of the Port
4. Review the infrastructure additions that are undertaken at Kolkata Port and other competing ports in the region
5. Guide in preparing the total logistics costs model for the Port taking into view various influencing factors
6. Undertake traffic growth and forecast for top 12 commodities at the KOPT
7. Interactions with Client, quality control and ensuring client satisfaction

Title of Work: Feasibility Study for Development of FTWZ in Visakhapatnam

Year: Jul 2019 – Oct 2019

Location: Visakhapatnam, Andhra Pradesh

Client: Indian Ports Association (**Main Client: Visakhapatnam Port Trust**)

Position Held: Team Leader

Main features:

Visakhapatnam Port Trust (VPT) has proposed development of FTWZ in the area near Port and intends to seek funding assistance from Sagarmala Program for the same. The Port Trust had, in 2016, undertaken a market study for development of MMLP at the land parcel identified by the Port, in which the consultants have also made a basic assessment for FTWZ. VPT intends to update the study for development of FTWZ by updating the market assessment as well as undertake financial feasibility for the same. VPT has appointed Indian Ports Association (IPA) for undertaking the study and submit the report. IPA has engaged Sekhar Tanguturi along with two of his associates for leading the study and provide a high-quality report.

Activities Performed:

1. Market assessment comprising the below:
 - a. Location Analysis and SWOT

- b. Connectivity Assessment
 - c. Needs assessment for setting up of FTWZ, identify potential key users
 - d. Estimate current demand and forecast future growth potential
 - e. Competitor Assessment
- 2. Review of the Financial Assessment and provide inputs
 - a. Revenue and cost models
 - b. Key financial metrics
 - c. Scenario analysis
- 3. Regulatory assessment for setting up of FTWZ
 - a. Regulatory Assessment on Setting-up of FTWZ
 - b. Minimum Requirements and process
 - c. Benchmarking of 1-2 other operational FTWZs in India
- 4. Primary interactions with key stakeholders
- 5. Preparation of report and client presentations

Title of Work: Industry Assessment and Vision Plan for Ananthapuramu-Hindupur Region for Ananthapuramu-Hindupur Urban Development Authority

Year: Feb 2019 – Ongoing

Location: Andhra Pradesh, India

Client: L&T Infrastructure Engineering Limited (**Main Client:** Ananthapuramu-Hindupur Urban Development Authority)

Position Held: Market Analysis Expert

Main features: Ananthapur-Hindupur Urban Development Authority (AHUDA) has issued an RFP for Consultancy Services for:

- a. Review & Updation of Draft General Town Planning Scheme (Masterplan) for Ananthapuramu Municipal Corporation in GIS format with special emphasis on Urban Infrastructure, Transportation, Industrial and Investment plan (Except preparation of Master Plan) GIS base map prepared by APMDP will be provided with layers.
- b. Preparation of New master plan and ZDPs for Dharmavaram & Hindupur Municipalities in GIS format with special emphasis on Urban infrastructure, Industrial, Transportation and Investment plan (GIS base map prepared by APMDP will be provided with layers).
- c. Preparation of Perspective Plan, Master Plan and ZDPs for the entire AHUDA Region in GIS Format with special emphasis on Urban Infrastructure, Transportation, Industrial and Investment plan.
- d. Detailed Zoning Regulations for AHUDA region.

L&T Infrastructure Engineering Limited (L&TIEL) has been selected as preferred consultants and have received the letter of award from AHUDA to undertake the above scope and the Terms of Reference that is part of the RFP. Mr. Sekhar was the named expert for undertaking the Market Analysis and developing Industrial Vision for the region

Activities Performed:

- 1. Assessment of potential industrial and Urban development including projection of future employment
- 2. Review & Revision of existing draft master plan keeping in view the proposed industrial area and urban growth in the AHUDA region.
- 3. Suggest Policy Interventions for each sector and Plan Implementation Mechanism.
- 4. Industrial Development plan: Through a realistic estimated demand, prepare Industrial Development Plan, which suggests appropriate locations for future employment areas, new growth centres, counter magnets, and provides for adequate land for key public infrastructure including hierarchy of industries in the zones
- 5. Regional Economic base assessment - Inventory of existing, on-going, and proposed land use, industry, and infrastructure development initiatives in the vicinity of the proposed project area.

6. Economic sectors' assessment- Determine sectors where AHUDA region exhibits competitive strengths such skilled manpower, resource base, cost advantage, etc.
7. Review of all sectoral policies, strategies and plans and G.O.s existed.
8. Study of Economic and Investments Scenario in Andhra Pradesh including the trends in economy, investment attractiveness, comparison with other states and regions, leading destinations of investments, attractiveness of AHUDA from an investment standpoint.
9. Devise effective strategy to conduct consultation with stakeholders including civil society of both urban and rural areas, agriculture community, industrialists, traders, elected representatives, academicians, government, and non-governmental organizations.
10. Identification of opportunities, strengths and weaknesses and threats for the development of the AHUDA region related to industrial development and investments.
11. Assist the team in Vision - 2039 and strategy formulation.
12. Finalize on industries within each sector in which the local area holds clear advantage like local skill availability, market access, raw material availability, external infrastructure quality and linkages, foreign FDI interests.
13. Development of a product mix to be used as a basis for the preparation of the final land use plan which will include among other things, a list of industries and activities with land requirements.
14. Economic sector development and employment generation, strategic plans to invite foreign investments at strategic growth points for economic sustainability and balanced growth.

Title of Work: Pre-bid Assistance for DocOnline Consulting Private Limited

Year: Feb-Mar, 2019

Location: Telangana

Client: DocOnline Consulting Private Limited

Position Held: Consultant

Main features:

The State Innovations in Family Planning Services Project Agency, Lucknow ("SIFPSA" or "Authority") is committed to improve the healthcare services in the state of Uttar Pradesh and engaged in the development of health infrastructure and provisioning of effective healthcare services across the state. The Authority seeks to engage a private agency (the "Service Provider") for implementation of e-PHC Services in select PHCs ("Project"). The Authority has decided to carry out the Bidding Process (defined hereinafter) for the selection of Service Provider to whom the Project may be awarded. The Project is proposed to be implemented in 10 (ten) select primary healthcare centres (PHC) in the state of Uttar Pradesh.

Activities Performed:

1. Assisted in review and interpretation of Bid Documents
2. Assisted in preparation of all relevant documentation.
3. Assisted in resolving queries and e-submission of Bid.
4. Assisted in providing clarifications sought by the Authority

Title of Work: Capacity building in PPPs for senior government officers in Uganda

Year: June 2018 – Feb 2019

Location: Uganda

Client: CRISIL Infrastructure Advisory (for World Bank and PPP Unit, Uganda)

Position Held: Co-Trainer

Chakravarthy and Capital Fortunes Private Limited have been assisting Amaravati Development Corporation Limited, AP Capital Region Development Authority towards the new capital city development initiatives; and other private sector international investors to facilitate investments in the state of Andhra Pradesh.

Government of Andhra Pradesh (GoAP) entered into a Concession Agreement with Amaravati Development Partners Private Limited and Singapore Amaravati Investment Holdings Pte. Ltd to develop / set up a Start-up Area as part of the new capital city for the State of Andhra Pradesh – Amaravati – that will be located on the southern bank of River Krishna, lying between the cities of Vijayawada and Guntur. The Concessionaire would develop Start-up Area which means the parcel of land admeasuring 6.84 sq. km (equivalent to 1,691 acres inside the Seed Development Area. Amaravati Development Corporation, the project management arm of Government of AP has engaged the services of Capital Fortunes Private Limited as project management consultant for assisting the GoAP in managing the contract and preparing Contract Administration Manual.

Mr. B.S. Chakravarthy, Team Leader for the engagement has engaged services of Mr. Sekhar Tanguturi for undertaking the assignment.

Activities Performed:

1. Assistance in reviewing the key contract documents of GoAP for new capital city projects.
2. Drafting the outline for Contract Administration Manual
3. Preparing post-award contract administration manual for ADCL towards monitoring and managing the contract signed between GoAP and the Amaravati Development Partners including the institution structure, Risk assessment mechanisms, Key Performance Indicators, periodical contract monitoring and reports.
4. Attending key meetings and preparing policy notes and other material to assist investors

Title of Work: Preparing notes for World Economic Forum with reference to accelerating private investments into Infrastructure in India

Year: Oct 2017

Location: India

Client: For KPMG Advisory Services Pvt Ltd., as part of initiative taken up for World Economic Forum

Position Held: Consultant/ Subject Matter Expert

Main features:

The initiative is part of knowledge partnership provided by KPMG to World Economic Forum.

Activities Performed:

1. Identifying various issues related to infrastructure investments in India with focus on PPPs and ideating on key interventions required.
2. Primary interactions with select developers and bankers.
3. Preparation of short note on key issues

Title of Work: Preparation and Implementation of the Comprehensive Integrated Master Plan for the Vizag-Chennai Industrial Corridor (VCIC)

Year: Jul 2016 - Jun 2017

Location: India

Client: Asian Development Bank – consortium with Surbana Jurong Pte Ltd, Singapore

Position Held: Project manager.

Main features:

The Master Plan will be prepared for the four industrial nodes of the corridor incorporating the industrial clusters based on assessment of specific existing baseline levels and projected growth levels.

For each node, the following key themes will be addressed:

- a. Delineation of the zones/areas where the development is expected to be focused, along with associated permissible land-uses in respective regions within the zone/area to optimally utilize any existing infrastructure or unutilized industrial lands; Delineation and land detailing including verifications should be undertaken for each industrial cluster.
- b. Development plans for external and internal infrastructure (physical as well as socio-economic) including, but not limited to, transport and logistics infrastructure (roads, rail networks, airports, and ports); water, waste (wastewater and solid waste), and sewerage systems; and power supply; Aforementioned infrastructure development plan should also be prepared for each industrial cluster.
- c. Financing plan for the identified project clusters
- d. Institutional structures to ensure coordinated development and management of infrastructure proposed to be developed.
- e. Strategies for harmonized industrialization and urbanization processes
- f. Environment management and social safeguard plan

Activities Performed:

1. Undertaking the detailed market assessment, primary interactions, preparation of industry selection frameworks and selection of industries
2. Feasibility assessment, project structuring at node level
3. Project management with lead consultants, client, and sub-consultants
4. Quality assurance, timely delivery, and client interface

Name of assignment or project: Industrial Assessment and Strategy for Odisha as part of the Kolkata-Vizag Industrial Corridor TA

Year: Jan 2017- Jun 2017

Location: ODISHA, India

Client: Asian Development Bank TA for individual consultant contract (for KPMG)

Position Held: Team Member

Main Project Features: Identify the key industrial sectors for development in Odisha and provide longterm perspective of industrial vision for Odisha.

Activities Performed:

- a) Undertaking the detailed market assessment, primary interactions, preparation of industry selection frameworks and selection of industries
- b) Industrial output projections and land-area requirements
- c) Identify key drivers for industrial growth and coordinate with other consultants for infrastructure planning

Title of Work: Consultancy Services for Preparation of Techno-Economic Feasibility Study Report for Development of Multi Modal Logistic Park (MMLP) at Visakhapatnam

Year: Mar 2016 – Dec 2016

Location: India

Client: Visakhapatnam Port Trust

Position Held: Project manager

Main features:

1. Identification and suitability of location for the proposed rail-linked MMLP planned at Visakhapatnam Port Trust
2. Assessment of rail connectivity in terms of alignment of the siding, take-off point from Indian Railways
3. Market Assessment and Demand Forecasting – Cargo demand and the quantum and nature of the present day commodity-wise inward and outward cargo flows by rail, road and air based on primary and secondary data collection exercise
4. Master planning and Assessment of Internal facilities - Based on the market assessment, evaluation of primary and secondary data collection and globally accepted international best practices adopted for planning of MMLPs across the world, providing benefits and limitations of various concept master plan alternatives and taking up detailed master planning of proposed facilities within the finally approved alternative for the proposed MMLP
5. Development of a detailed financing model to work out cash flow statement and the financial viability of the project including FIRR along with sensitivity analysis based on the revenue stream and cost of setting up such Financial Indicators including Payback period, IRR, NPV, Profitability ratio, Sensitivities and Scenarios
6. Economic analysis for the project, which shall include but not limited to econometric analysis, estimation of economic IRR etc. for the project.
7. Suggestion of different institutional mechanisms for setting up and running/managing the logistics park and based on merits/demerits of each, recommending the best possible institutional mechanism for each MMLP based on relevant details specific to each one of them

Activities Performed: Lead the team in undertaking various activities indicated above. Quality assurance, client interface and timely delivery of output. Participated in primary interactions and ideating about the key discontinuities that will help the Client in preparing for the future infrastructure needs.

Title of Work: Market Assessment for developing a multi-modal logistics hub at Durgapur, West Bengal, India

Year: Jan 2016 – Apr 2016

Location: India

Client: Distribution Logistics Infrastructure Private Limited

Position Held: Project manager

Main features:

- DLI is a logistics service provider, involved in providing integrated logistics solutions to its customers. DLI is proposing to set up a Multimodal Logistics Hub at Durgapur for which a detailed market assessment study was required to be done.

Activities Performed: Lead the team in undertaking various activities indicated below. Quality assurance, client interface and timely delivery of output

- a) Assessed the project influence area with assessment of current modes/linkages – rail and road, existing industrial cluster and competing facilities
- b) Assessed the current traffic in the project influence area for the identified commodities. Understood the key demand drivers for the logistics requirements, Modal mix and origin-destination for the identified commodities
- c) Extensive primary interactions in Kolkata and Durgapur regions.
- d) Projected the traffic for the next 7 years for the identified commodities based on proposed expansion plans of the key end user industries and industry research for identified commodities
- e) Assessed the addressable and achievable traffic for DLI by identifying the potential game changers for DLI and hence defining the services offered for the proposed facility

Title of Work: Marketing Strategy for ramping up container volumes at Krishnapatnam Port Container Terminal

Year: June-Nov 2015

Location: India

Client: Krishnapatnam Port Company Limited

Position Held: Project manager

Main features:

The Container Terminal at Krishnapatnam Port was facing challenges in ramping up its container traffic despite advantages of good connectivity, equipment, back-up infrastructure and an available hinterland. The port wanted to understand the targetable market for the port and understand the various strategies to attract these cargo to the port with a focus on increasing its imports. They also wanted to understand the potential for developing industrial clusters for Electronics, Timber and leather in the port special economic zone for captive cargo generation

Activities Performed: Lead the team in undertaking various activities that included:

- a) Diagnostic review of the Container terminal
- b) Extensive market interactions
- c) Detailed evaluation of customs data, assessment of competitive advantages from the time and cost perspectives to various identified clusters, commodities, and players
- d) Review of case studies of successful container terminals in the country
- e) Assessment of trade chain and advise on interventions required
- f) Advising on various initiatives and strategies that could port could adopt to ramp-up traffic
- g) Value-chain analysis for key commodities and evaluation of potential for cluster development at the Port

Title of Work: Retainer consultant for Programme Management Support

Year: 2015-16

Location: India

Client: Infrastructure Corporation of Andhra Pradesh (INCAP)

Position Held: Project manager

Main features:

- a) Concept Preparation and Pre-feasibility Studies
- b) Assistance in Bid Process Management
- c) Capacity Building of INCAP
- d) Drafting of Policies
- e) Program Monitoring
- f) Investment Facilitation
- g) Knowledge Sharing

Activities Performed:

1. Pre-feasibility study, and Transaction advisory services (including project structuring, bid process management) for setting up of three international schools in the state of Andhra Pradesh (Project Manager)
2. Pre-feasibility study and Transaction advisory services (including project structuring, bid process management) for **setting up of integrated sports complex** in the state of Andhra Pradesh (Project Manager)
3. Transaction advisory services for multiple airport projects in the state of Andhra Pradesh (Team Member)

Title of Work: Assistance in Operationalizing Namibia's PPP Policy and Capacity Building for government officers in Namibia

Year: 2013-14

Location: Namibia

Client: Ministry of Finance, Namibia

Position Held: Team Member

Main features: The Government of Namibia has taken the first steps towards attracting private investments in the areas of economic, social, municipal, or social assets by way of development of a national PPP policy. As per the provisions of the national PPP policy, the Ministry of Finance (MoF) is expected to take a leading role in enablement and approval of PPP projects in the country. With this backdrop, MoF has appointed CRISIL Infrastructure Advisory to assist them on various activities related to operationalizing the PPP policy.

Activities Performed: Assisted in preparation of guidance material for all stages of PPP process, assistance in organization of the PPP unit under MoF, capacity building through design and delivery of agreed PPPs related training programs, identification of two pilot PPP projects from a master list of projects identified through interactions with all Ministries, which can be further taken up for development and PPP procurement.

Title of Work: Assessment of Coastal Cargo potential for the state of Gujarat

Year: 2015

Location: India

Client: Gujarat Maritime Board

Position Held: Project manager

Main features: As a part of its initiative to increase the coastal cargo and enable modal shift from surface transport to sea, GMB has selected consultants to assess the overall coastal cargo potential in the state of Gujarat, assess the cost-benefits through the modal shift, identify key impediments/ issues with the shift and also indicate incentives that could be extended to encourage the players.

Activities Performed: Led the project team to undertake traffic assessment, primary interactions at various locations in the state and with multiple stakeholders, identify key issues and advise on the various measures that were required at state and central levels to increase the coastal cargo volume in the state.

Title of Work: Revalidation of Traffic Study for Kattupalli Port

Year: 2015

Location: India

Client: L&T Limited

Position Held: Project Manager

Main features: Kattupalli International Container Terminal (KICT) is located near Chennai, adjacent to the Ennore port in Thiruvallur district of Tamil Nadu. KICT is being developed by L&T Shipbuilding Limited (LTSB), a joint venture between Larsen & Toubro (L&T) and Tamil Nadu Industrial Development Corporation (TIDCO). L&T Limited intended to assess the overall traffic potential at the port including bulk commodities for the purposes of valuation and had mandated the Consultant to undertake a revalidation of the earlier traffic study and conduct fresh traffic assessment and forecast for bulk commodities.

Activities Performed: Led the team for revalidation of traffic study for containers and other major cargo categories such as ro-ro, break-bulk, bulk including coal and fertilizers; Competition benchmarking for the port; and Tariff benchmarking.

Title of Work: Assessment of coal traffic at new coal terminal at Beira Port, Mozambique

Year: 2014-15

Location: Mozambique/ India

Client: New Coal Terminal Beira S.A

Position Held: Project Manager

Main features: The Client had appointed the consultant to undertake a detailed study of the mining scenario in Mozambique, assess the export competitiveness, the connectivity infrastructure, upcoming developments on port infrastructure and therefore traffic and export potential for the new coal terminal proposed to be developed at Beira Port

Activities Performed: Led the team for field visits, primary interactions with all key stakeholders including ministries, mining companies and port developers; secondary study on mining, exports, export potential and export competitiveness; critical evaluation of competitive landscape and infrastructure facilities; traffic assessment and forecast.

Title of Work: Commercial due-diligence for a non-major port in Pondicherry

Year: 2015

Location: India

Client: Confidential

Position Held: Project Manager

Main features: Client had appointed the Consultant to undertake commercial due-diligence by critically assessing the market sizing, user perception and willingness to shift to the target port and provide detailed report on various commodities with traffic forecast.

Activities Performed: Led the team in designing the methodology, site visits, primary interactions and traffic assessment and forecast. The Client had concluded the study at the draft stage based on the initial assessment and advise by the Consultant on the low traffic potential and uncertainty of certain ongoing infrastructure projects in the vicinity.

Title of Work: Coal traffic assessment for Essar coal terminal at Paradip Port

Year: 2014

Location: India

Client: Essar Paradip Coal Terminal Limited

Position Held: Project Manager

Main features: Review of existing studies, identification of key user segments, market assessment, traffic modelling, bottleneck analysis, traffic assessment and forecast.

Activities Performed: Led the team on the study for undertaking hinterland and port-side analysis, assessment of competitive landscape, traffic assessment and potential; timely delivery and quality assurance.

Title of Work: Consultancy services for approval of up front tariff fixation by TAMP for IKBL Barge Jetty for third party cargo handling

Year: 2013-14

Location: India

Client: Indian Farmers Fertilisers Co-operative Limited (IFFCO)

Position Held: Project Manager

Main features: M/s IFFCO Kisan Bazar and Logistics Limited (IKBL) had set-up Captive Barge Jetty of 2 MMTPA capacity at Kandla Port. The jetty was expected to handle imported solid raw materials and finished fertilizer products. A Concession Agreement was signed on 17th February-2011 between IKBL & Kandla Port Trust (KPT) which required the jetty to be available for handling third party cargo also and therefore

required a TAMP approval for the tariff to be levied for third party cargo. IKBL had appointed the Consultant to assist in preparing the tariff application to TAMP as per the extant guidelines, assist in submission, follow-up, provide clarifications as sought by TAMP up to the approval of tariff.

Activities Performed: Preparation of TAMP application as per TAMP guidelines for PPP projects, 2008 and as per guidelines of 2005; Reply all the queries raised by TAMP authority and follow-up.

Title of Work: Commercial Due-diligence for a Port opportunity in Andhra Pradesh

Year: 2013

Location: India

Client: Haskoning India Private Limited

Position Held: Project Manager

Main features: Commercial due-diligence for a non-major port in Andhra Pradesh for a European bilateral fund by validating traffic studies for various commodities, expansion plans, assumptions in financial model and risk assessment as per the Concession Agreement

Activities Performed: Review, validate and correct, where necessary, current traffic, future demand (market) and expected growth; reviewed business plan of the company (management case); competitor assessment; detailed hinterland growth assessment for multiple commodities; revalidation of financial assumptions and forecast; risk assessment of contractual obligations with customers and Concessioning authorities; risk mitigation mechanisms.

Title of Work: Traffic Study and Business Plan for Kattupalli Port

Year: 2013

Location: India

Client: L&T Shipbuilding Limited

Position Held: Project Manager

Main features: Kattupalli International Container Terminal (KICT) is located near Chennai, adjacent to the Ennore port in Thiruvallur district of Tamil Nadu. KICT is being developed by L&T Shipbuilding Limited (LTSB), a joint venture between Larsen & Toubro (L&T) and Tamil Nadu Industrial Development Corporation (TIDCO). L&T Shipbuilding Limited (LTSB) has mandated the Consultant to prepare a strategic business plan and conduct a traffic study for containers and other major cargo categories. The total estimated cost of the project is over Rs. 2500 crores

Activities Performed: Led the team to deliver the activities including Assessment of traffic for containers and other major cargo categories such as ro-ro, break-bulk; Competition benchmarking for the port; Tariff/pricing structure; Preparation of a Strategic Business Plan including Detailed financial feasibility study for port development, Diagnostic evaluation of environment.

Title of Work: Master Plan for Gujarat Ports

Year: 2013

Location: India

Client: Haskoning India Pvt. Ltd

Position Held: Team member

Main features: Haskoning India Private Limited (HIPL) was entrusted to develop master plan for three existing ports in Gujarat, owned by a major private port player. These ports mainly handled captive cargo and the port player was interested to develop facilities for handling third party cargo. The assignment also involved services for undertaking traffic assessment and forecasting for these ports along with financial feasibility exercise.

Activities Performed: Part of team engaged in preparing traffic assessment models, primary interactions with select stakeholders, traffic projections and financial modelling exercise

Title of Work: Hand-holding assistance for review of a port in Andhra Pradesh

Year: 2012-13

Location: India

Client: Entity under Government of Andhra Pradesh

Position Held: Project Manager

Main features: The state government has signed a concession agreement in 2002 with a private developer for the development of a greenfield non-major port in the state of Andhra Pradesh for a concession period of 30 years (extendible by mutual consent). After about 9 years of signing the agreement, the government intended to review the progress of the project and compliance of various clauses in the concession agreement and other project agreements both by the Concessioning Authority and the Concessionaire. In addition, the Government also sought close review of the new proposals submitted by the Port for expansion of its facilities in partnership with a third party. The government has therefore appointed the consultant to provide hand-holding assistance to undertake critical review of the various developments, advise on way ahead and also provide monitoring frameworks to assist in monitoring the performances.

Activities Performed: Detailed and critical review of the Concession Agreement and related Project Agreements; provide views on the expansion plans and project structure proposed by the Concessionaire to indicate whether the same fall under the purview of CA; provide overall guidance

Title of Work: Business Case for development of Container Berth

Year: 2012-13

Location: India

Client: Confidential

Position Held: Project Manager

Main features: One of the non-major ports in east coast of India was under expansion mode and was currently constructing additional berths with fully mechanized handling facilities for various breakbulk commodities and was deliberating on proposal to develop a dedicated container berth. It had appointed the Consultants to develop a business case for container berth, find an appropriate partner, advice on commercial structuring and support in finding various options and alternative for developing container terminals at the Port. The estimated project cost of the development of over Rs. 250 crores

Activities Performed: Various activities involved Port Profiling, traffic assessment; Phasing of development by evaluating traffic vis-à-vis economies of creating a new berth with dedicated container handling facilities and economies of operating at existing berth using MHCs; Financial modelling; Commercial structuring after review of Concession Agreement of port and advise on various business models, evaluate returns to developers in various models and advise on optimal models and prioritize the options. Involved in all the client interactions presentations for client pitch including a presentation made in Singapore.

Title of Work: Financial and Transaction Advisory Service Consultant for PurukCahu- Bangkuang Coal Rail Project for IIGF

Year: 2012

Location: Central Kalimantan, Indonesia

Client: Indonesia Infrastructure Guarantee Fund

Position Held: Team member

Main features: The Province of Central Kalimantan is home to some of the largest deposits of coking coal in the world. Yet, their exploitation has been hampered by lack of transport infrastructure. The Provincial Government of Central Kalimantan (PGCK) wished to address this infrastructure gap by procuring the construction and operation of a specialist coal rail system through a public-private partnership (PPP). The Indonesian Infrastructure Guarantee Fund (IIGF) was established and fully capitalized by the Government of Indonesia to provide guarantee of government obligations under competitively procured PPP contracts. IIGF has approved the use of its internal funds to support the transaction of the Central Kalimantan Coal-Railway Project. IIGF engaged the services of an investment bank as well as a set of international technical and legal consultants to provide Transaction & Financial Advisory services to the project and to undertake and assist with the subsequent bid implementation. The estimated cost of the project was over USD 2.5 billion

Activities Performed: Assistance from RFP stage up to Bid Submission including review of market assessment studies, review of financial model prepared by financial consultants, Assistance on Communication with Bidders and Stakeholders, Preparation, review and finalization of Request for Proposal, preparation of Guarantee Application Package, critical review of draft concession agreement, and bidder meetings.

Title of Work: Project Consultant for Kannur International Airport Project

Year: 2012

Location: India

Client: Kannur International Airport Limited

Position Held: Team member

Main features: Government of Kerala (GOK) intended to establish a Greenfield international airport at Kannur. GoK has selected the site and has obtained the in-principle approval of Government of India to establish the proposed airport. Kannur International Airport Limited (KIAL) has been incorporated as a public limited company for the development and management of the project. KIAL selected the consultants through an open competitive bidding process as project consultants for the airport development. The consultants will be handholding KIAL to develop the Kannur International Airport Project from the design to the operational stage and provide strategy, technical, finance (excluding financial closure), legal and operational consulting support. The estimated cost of the project was over Rs. 2000 crores

Activities Performed: Review of existing DPR with particular reference to project financial analysis and project financial viability; propose alternate financial plan/ structure; assistance in locating investors, planning of fund raising methodology and implementation; assist in preparing optimum business plan advising the airport operator on the best possible business model based on which to run the airport for each of the cost/profit centres.

Title of Work: Land-side Developments study – Port-based logistics facilities study

Year: 2011-12

Location: India

Client: PSA India Pte. Ltd

Position Held: Project Manager

Main features: The client, one of the largest container port operators globally was keen to explore land side opportunities in India and mandated the Consultant to undertake a market assessment study on the same. The study required assessment of land-side developments of key competitors in terms of scale, scope, spread, and broad profitability. Market assessment of various land-side developments based on cargo movement and identification of suitable projects such as Inland Container Depot (ICD), Container Freight Stations (CFS), logistics parks, tank farms, etc. Assessment of the existing facilities for the identified land-side developments. The study was to be done using a combination of primary traffic surveys at Ports

and CFS, primary interactions with key stakeholders such as end users and intermediaries (CHA, Freight forwarders, 3PL Players), and secondary desk research.

Activities Performed: Was responsible to supervise the primary traffic surveys, evaluating the various opportunities and advising to the client on the appropriate options for investment through study of all possible opportunities, assessing the risk factors and key market drivers for each option, assess future growth and upcoming investments in the sector and provide detailed report on the same
