9.	Work Undertaken that Best Illustrates Capability to Handle the Tasks Assigned			

1. LNG Study at Kakinada Port (Bothra Group) (December 2024 – March 2025)

The assignment involved a comprehensive assessment of India's natural gas sector with specific reference to LNG development at Kakinada Port. My role included evaluating supply-demand trends, policy frameworks, hinterland demand potential, and gas pipeline connectivity, while preparing both optimistic and conservative demand scenarios. I developed detailed financial viability models covering capex, operational costs, revenue forecasts, and metrics such as IRR, NPV, and payback period, supported by sensitivity analysis. In addition, I structured cash flow models to assess potential revenues from port dues, terminal charges, and regasification tariffs, benchmarked against peers, and advised on investment structuring options under PPP and private funding modes.

2. Market analysis and commercial assessment of simar port (October 2024 – December 2024)

In this assignment, I supported the strategic assessment of Simar Port's LNG development potential, including demand drivers, end-user industries, and port sector dynamics. The work involved analyzing hinterland demand, pipeline connectivity, and infrastructure readiness at Chhara Port to estimate utilization potential. I also developed revenue outlook models incorporating captive and third-party offtake, tariff structures, and throughput projections. As part of the financial assessment, I conducted scenario analysis (base, downside, and upside cases) to evaluate impacts on revenue, IRR, and project viability, and provided inputs for the commercial and concession agreement evaluation to ensure long-term competitiveness.

3. Valuation of an east-coast based Seaport for a potential sale transaction (July- November 2021)

The client, a private-sector owner of a bulk-focused seaport on India's east coast, was exploring a potential sale transaction and required sell-side valuation support. In my role as the financial expert, I assisted in developing future financial estimates, prepared detailed valuation models (DCF and comparables), and provided key analytical inputs to strengthen the client's position during negotiations.

4. Project & Financing options analysis for Kerala State Road Project (KSTP) (December 2011 - October 2012)

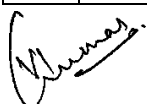

As part a World Bank funded project, KSTP planned to enhance a section of state highways and intended to understand the most appropriate project & financing structure. KSTP appointed CRISIL to analyze the various project structures and suggest a workable project structure as also develop the bid process documents. As the Project Manager, I was involved in the options analysis and suggesting the optimum mode for the project.

5. Identifying projects for pilot PPP program in Sierra Leone as part of a World Bank project (August 2013-January 2014)

The World Bank in its effort to develop public infrastructure in the war-ravaged African country of Sierra Leone wanted to identify pilot projects, which could be undertaken on PPP mode to help develop the publicinfrastructure in the country. The World Bank appointed CRISIL to do the initial groundwork to assess the requirements, identify priority areas and develop a method for selection of pilot projects. The project involved leveraging the global PPP experience and interactions with various stakeholders including the Government of Sierra Leone, development agencies like World Bank, African Development Bank, donor agencies like DIFD, private sector investors and others. As the Project Manager, I was involved in the extensive consultation processes to understand the requirements, the constraints, and the focus of the country, **analyzing different project concepts and developing an acceptable framework** for selection of the appropriate pilot projects.

6. Evaluation of pilot projects in Kenya and Ghana and assisting the nodal agencies in evaluation frameworks, as part of a World Bank Project (January 2013- June 2013)

As part of a World Bank project to assist key African countries develop capabilities in evaluation of projects for PPP mode, CRISIL was appointed to help create awareness among the nodal agencies in these countries on key enablers, with focus on Government

subventions like viability gap funding, subsidies, guarantees etc. As part of the assignment, CRISIL was to develop a concept note on the various forms of government assistance, their uses, merits and demerits and experience across the world and then use the framework for evaluation of pilot projects in the two countries. The concept note was to form the basis for a detailed policy on the government assistance for PPP projects. As the Project Manager on the assignment, I was responsible for developing the concept notes to help the nodal agencies understand the tools in a more comprehensive manner and interactions with various governmental agencies to help them appreciate the concept.

7. Market Assessment for Container Freight Station (CFS) for a potential buyout transaction (September November 2021)

The Client was looking for an assessment of EXIM linked CFS for a long-term perspective for a potential buyout transaction. As the logistics expert, my role involved assisting the data analysis and forecasting of long-term traffic to estimate the revenue generation scope of CFS in the emerging EXIM scenario

8. Assessment of Strategic Opportunities for Income from non-core segments for Maharashtra State Road Transportation Corporation (MSRTC) (June 2018- March 2019)

MSRTC was seeking additional income generation from its non-core operation by exploiting its network and assets like additional land. The assignment involved finding, assessing, and shortlisting opportunities and outlining a strategic path for MSRTC. As the logistics sector subject market expert, my role involved creating the framework for market research & evaluation of opportunities, leading the feasibility exercise and the strategic assessment of the shortlisted options.

9. Contract structuring, design and preparation for appointment of consultants for Wardha Gandhi Memorial Project for the Government of Maharashtra (April – November 2014)

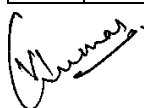

The Government of Maharashtra was seeking to appoint architects and PMC for the Gandhi Project at Wardha. The assignment involved defining the scope of work for different works, work schedule and preparing the RFP and consultant contract. As the sole consultant, I was responsible for the overall work, interactions with key government & other stakeholders, advising the client on the tender process and post award contracting.

10. Transaction Advisory to Food Corporation of India (FCI) for the grain silo project (November 2012-February 2014)

FCI planned to develop large capacity grain silo at multiple places, adding upto a capacity of 2 million tons on PPP basis, a first of its kind in the country including on BOO basis. For the project, FCI needed transaction advisor to help in project conceptualization, developing the project structure, financial modelling & assessment, developing documents including RFQ, RFP and Concession Agreement, manage the bid process and coordination interactions between various government departments and bodies. As the Project Manager, I was involved from the project conceptualization to the launch of the bid process stage. During this stint, I was leading the efforts from the part of the Transaction Advisor and closing involved in all aspects of assignment.

11. Transaction Advisory to Asian Development Bank (ADB) funded project of Department of Economic Affairs (DEA) for food grain storage infrastructure (December 2012-February 2014)

As part of an ADB funded project, DEA (MoF, GoI) wanted to develop pilot project on BOT basis in the food storage infrastructure space. DEA appointed CRISIL as the Transaction Advisory to evaluate different options, develop project structure, develop bid process documents, and assist in the bid process management and coordination with various government bodies. As the Project Manager, I was involved in evaluating different options,

understanding the requirements of the project, developing appropriate project structure, term sheet for the project, developing the documents and coordination between various government bodies.

12. Transaction Advisory to IRCTC for Rail Neer Project (October 2012-February 2014)

IRCTC planned to develop packaged drinking water capacities across the country on PPP mode for the first time. IRCTC needed a transaction advisor to help in project conceptualization, developing the project structure, developing documents including RFQ, RFP and Concession Agreement, and managing the bid process. Three projects were awarded as part of the first phase and six more projects are currently under bid evaluation stage. As the Project Manager, I was involved from the project conceptualization to the launch of the bid process stage. During this stint, I was leading the efforts from the part of the Transaction Advisor.

13. Commercial due diligence of one of the largest domestic road logistics player for a private equity player (June 2011-October 2011)

The assignment involved review of the business structure of Goods Transport (FTL, Parcel & Express segments), assessment of demand-supply scenario, competitor analysis, benchmarking of pricing and cost structure with peer group, review & analysis of freight rates, identification & assessment of key operational parameters & their impact on operating profitability and overall assessment of the sustainability of the business and its profitability, valuation analysis and risk assessment. As the Project Manager, was responsible for overall project management, identifying key issues, interactions with key players, identifying and summarizing key findings and preparation of reports.

14. Feasibility assessment and Business Planning for a Cold Chain for a Mumbai based Logistics Player (December 2011-June 2012)

The assignment involved assessing the feasibility of a cold chain, as a business extension of the existing reefer transportation business and business planning for the same. It involved assessment of market structure, demand-supply scenario, pricing dynamics, competition analysis, financial projection and investment return analysis, identification of value propositions and their strategic evaluation and preparation of a business plan for the same. As part of the assignment, multiple interactions with players on the demand and supply side were undertaken. As the Project Manager, I was involved in the interactions with market players, analysis of market dynamics, identifying key costs, evaluating business models, client interaction and overall project management.

15. Market feasibility assessment for Container Traffic on Inland Waterways for CONCOR (July 2012- December 2012)

CONCOR has appointed CRISIL to independently evaluate the market potential of container traffic on key inland waterways and assess its business feasibility. The assignment involved analysis of traffic flows through multiple modes in the various regions, assessment of market dynamics, assessment of capital expenditure, estimation of likely traffic and evaluating business models. As part of the assignment, there were multiple interactions with logistics players, focusing on key areas in West Bengal, Orissa, Kerala, Assam, and Bihar. As the Project Manager, I was responsible for interactions with market players, analysis of market dynamics, evaluating business models, client interaction and overall project management.

16. Bid Advisory assistance to an infrastructure player for a NHAI road project (2013)

A leading infrastructure player had sought assistance of CRISIL in preparation of the bid of a NHAI in Maharashtra. As part of the assignment, a traffic study for estimation of current traffic flows and long-term assessment of potential traffic was conducted. This involved traffic study on the route, industrial and agricultural activities in the region, potential economic activities and investments in the region and estimation of likely traffic and revenue

potential, financial modelling and estimation of feasible negative grant for the bid. As the Project Manager, I was responsible for the traffic study and assessment of the future potential, financial analysis and bid scenarios, advising the client of the reasonable bid amount and overall project management.

17. Identifying pilot projects for PPP for the Government of Namibia (August 2013-November 2013)

The Government of Namibia (GoN) identified PPP as a focus mode for development of public infrastructure, which in turn would help the country on its path to becoming an industrialized economy. GoN appointed CRISIL to assist in the process of identifying pilot project. This was part of the larger assignment of assistance in operationalizing the PPP policy in the country. As the PPP expert, I was involved in extensive interactions with various Governmental agencies to understand their development priorities, understand the relevance to the overall national priorities, use international experiences in PPP and infrastructure development and develop a framework to assist the nodal agencies in identifying the pilot projects which could create the largest impact on public infrastructure in the country in a medium term.

18. Appraisal of a large South India based project for potential equity investment (2010)

ICICI Venture was evaluating investment in a large port. The key aspects of evaluation involved Market assessment of the Exim trade, particularly for the dry bulk cargo, from the South India hinterland, Assessment of existing and upcoming port capacity on the southern coast, Appointment of a consultant to assess the upcoming power projects, the demand for imported. Coal from the power sector and likely movement of the imported coal through the target port. Defining the scope of the study and review of the report, Review of the capex plan and the means of finance, Assessment of the port charges and other sources of revenue for the target port, Review of the financial model, Discussion, and negotiation of the terms of investment, Risk assessment and Preparation of investment note and presentation to the Investment Committee. As part of the team, was involved in market assessment including demand-supply scenario, business model including financial analysis, defining the scope of due diligence study on power sector and imported coal demand, review of terms of investment and risk assessment.

19. Project Appraisal for Project Finance of a Special Economic Zone in Navi Mumbai (2007)

ICICI Bank was evaluating project finance for setting up of a SEZ in Navi Mumbai by one of the largest business groups in India. The appraisal involved assessment of potential economic activity in the region, assessment of specific demand for space within SEZ, assessment of regulatory landscape, review of capital expenditure plan, financial feasibility assessment, risk assessment and preparation of appraisal note. As part of the team, was involved in assessing the market potential, financial feasibility, and risk assessment of the project

I am willing to work on the Project and I will be available for entire duration of the Project assignment as required.

I, the undersigned, certify that to the best of my knowledge and belief, this CV correctly describes me, my qualifications and my experience.

Place: Mumbai
